MEMORANDUM FOR PROGRAM SECRETARIAL ELEMENTS

FROM: BRUCE B. SCOTT
ASSOCIATE ADMINISTRATOR, INFRASTRUCTURE AND ENVIRONMENT

[Handwritten signature]

PAUL BO SCO
DIRECTOR, OFFICE OF ENGINEERING AND CONSTRUCTION MANAGEMENT

SUBJECT: Guidance for Facility Information Management System (FIMS) Validations

REFERENCE: DOE Order 430.1B Real Property Asset Management

The Facility Information Management System (FIMS) is the Department's official repository of real property data. The Department relies on the FIMS data for real property decision-making and accounting of its \$77B in assets. Moreover, FIMS data is supplementally reported within the Department's financial statements and the General Services Administration's Federal Real Property Profile. Therefore, maintaining accurate and credible data in FIMS is critical to efficient operations and resource planning.

The referenced Order requires FIMS data be validated by site managers and contractors. However, it does not provide a validation process nor specify minimum levels of data accuracy. The attached guidance, prepared with Program input establishes a standard process with common expectations and outcomes. When applied with the statistical validation procedures successfully piloted within the Department, the guidance ensures a minimum level of data accuracy and internal control.

If additional information is needed, please contact Peter O'Konski at (202) 586-4502.
