

# Condition Assessment Information System (CAIS)/CostWorks Users Group Meeting March 2008

---

## Site Presentation

Presented by:  
Steve Patterson,  
CAIS Administrator/CAS Section Manager

# Pantex Plant

---

# Status of CAS Inspections and CAIS Data

---

## ❑ FY08 Inspections

225 = Number of buildings being inspected

990,819 = Square feet for these 225 buildings

12 = Number of OSFs to be inspected

## ❑ CAIS Database values

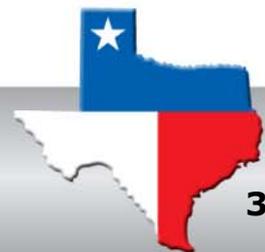

41,553 = Total number of Inspection Units (IUs) being tracked in CAIS

\$334,312,947 = Outstanding deferred maintenance (DM)

\$431,271,537 = Non-DM amount

\$115,068,840 = Total DM that has been completed since 2003

\$765,584,484 = CAIS database value for assets being inspected

# Projects and Sustainment Models

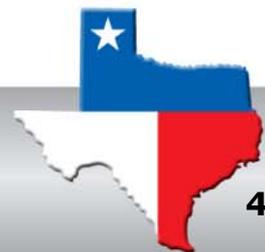

---

## ☐ Projects

- CostWorks being used to formulate project estimates that can include both deferred, and non-deferred maintenance items depending on the project scope of work
- CAIS data provides level of detail needed for specific deferred maintenance projects

## ☐ Sustainment Models

- CostWorks being used to formulate sustainment models that more closely resemble each asset
- CAIS data provides specific attributes of each asset that in most cases can be mapped to the CostWorks sustainment models

# Questions!

---
