

# **CostWorks Enhancements**

Proposed Enhancements

March 19, 2007

# Enhancements

- Discuss EES Enhancements and Pantex additions (handouts)
- CostWorks Exports to FIMS
  - Current Export
  - Proposed Exports
  - FIMS RPV flag addition?

# Current Export

- CostWorks develops building/trailer unit cost based on national avgs.
- CostWorks exports site, area, prop.id, unit cost to FIMS.
- FIMS calculates RPV based on location factor (weighted avg. cost factor) x GSF x site factor x CW unit cost.

# Proposed Exports

- Export CW developed Building and OSF RPVs.
- Annual Required Maintenance Cost. (1st year Sustainment cost)

# FIMS RPV Flag Addition

- FIMS RPV Flag indicates source of RPV estimate.
- Request For Change submitted to FIMS FAC to add a “W” to RPV flag choices to indicate CostWorks was source of RPV estimate.
- CostWorks exports will have “W” coded for FIMS population.
- Should this apply to OSFs?
