Costing Backbone

- Originally Nested Assemblies
- Went from 10 digit line number to 12 digit line number in March 2002. This was a twelve month effort.
- Included most of the Facilities Book
- Mapped nested assemblies to existing 12 digit items.
- Added the Assemblies
- Added the Green Costs

Software Architecture

- Oracle Database.
- Migrated from individual databases to a centralized database.
- Migrated from Client / Server to the Web.

Software Releases

- CAIS 2000 Client/Server
 - Started working on July 10, 2000
 - Delivered Release 1.0 on October 20, 2000.
- Centralized the databases on July 2004
- CAIS Web 1.0 August 2006
- Current Release: 1.15

The Real Story

- “Don’t worry, if this project fails, it will not ruin your career, only mine.”
- “What is a WBS?”
- “Can this project be saved?”
